Fingerfood Buffet Catalogue 2022
Sustainable wood disposables

Products made from renewable raw materials

Sustainability has become a very important factor when deciding which products to use, and with the use of plastics declining we have to look at alternative options for presenting food at an event.

Ruby Macaw are pleased to present many attractive options of bowls, boats, cups and skewers manufactured from wood and bamboo in the popular Papstar branding. Papstar is a climate neutral company, and sustainability is at the heart of every decision that is made.

Bamboo is a raw material that grows back extremely quickly, is very environmentally friendly and yet tasteless - it is naturally antibacterial, antimicrobial and hypoallergenic. The puristic production takes place without chemical additive such as melamine resin or dyes which makes it the perfect raw material for sustainable food display products.

All of our wood products come from sustainable, FSC certified forestry. Wood grows back, is environmentally friendly and biodegradable. All the products made from wood are unrestricted for direct allowed contact with dry, moist and greasy food but are unsuitable for holding liquids.

The skewers are suitable for use with vegetables, canapes, fish, poultry, fruits and more. Use in the oven, under a grill, on the BBQ or for displaying food at the buffet.

WOOD BOATS

Code	Description	Length	Width	Qty
84413	Pack 50 Wood Boats	85mm	55mm	10
84414	Pack 50 Wood Boats	110mm	65mm	10
